

LOGESHWARAN R S

Software Developer | Web & IoT Enthusiast | Cloud Learner

+91 9514336059 | logeshwaranrs@gmail.com | Erode, India

Portfolio: logeshwaren.netlify.app | linkedin.com/in/logesh-r-s-173a96289

PROFESSIONAL SUMMARY

Motivated M.Sc. Computer Science student at VET Institute of Arts and Science with hands-on experience in Python, web development, and IoT systems. Completed AWS Cloud Foundations certification and delivered multiple deployable web projects. Combines a solid technical foundation with practical project execution skills, seeking internship or entry-level software roles where I can contribute immediately and grow rapidly.

EDUCATION

M.Sc. Computer Science

2025 – 2027 (Pursuing)

VET Institute of Arts and Science (Affiliated to Bharathiar University), Erode

B.Sc. Computer Science with Data Analytics

May 2025

Kongu Arts and Science College (Autonomous), Erode | CGPA: 7.0 / 10

TECHNICAL SKILLS

Web Technologies: HTML, CSS, JavaScript, Responsive Design

Tools & IDEs: VS Code, Figma, Git, Arduino IDE

Cloud & Platforms: AWS (Cloud Foundations), Netlify

Hardware / IoT: Arduino, MAX7219 LED Matrix, Bluetooth Modules

Core Concepts: OOP, Problem Solving, Agile Basics

PROJECTS

Developer Portfolio Website | logeshwaren.netlify.app

- Designed and deployed a personal portfolio website from scratch to showcase projects, certifications, and technical skills
- Built with semantic HTML5 and CSS3, optimized for performance and cross-browser compatibility

Vizha App — Event Management Web Application | vizhaapp.netlify.app

- Built a fully responsive event management web application enabling users to browse, register, and manage cultural and college events
- Implemented clean UI/UX using HTML5, CSS3, and JavaScript with mobile-first design principles
- Deployed on Netlify with continuous deployment pipeline; live and accessible globally
- Designed interactive components including event cards, registration flow, and navigation for seamless user experience

Bluetooth Controlled Wireless Notice Board — IoT System

- Engineered a smart IoT notice board that receives and displays messages from an Android device over Bluetooth in real time
- Programmed Arduino microcontroller to interface with MAX7219 LED matrix driver for dynamic text rendering
- Reduced manual notice-updating effort by enabling wireless message broadcasting across a room-scale environment
- Demonstrated embedded systems integration: Bluetooth serial communication, C/C++ firmware, and hardware wiring

CERTIFICATIONS

- AWS Cloud Foundations — Amazon Web Services (Completed)
- Python Programming Certification
- Hardware Workshop Certification
